

Fundus Analysis Report

Name: yahs

Record Date: 2025-05-14

Printed On: 2025-05-14 10:39:08

Diagnosis:

- Arteriosclerotic Retinopathy: 0.94%
- Diabetic Retinopathy: 0.90%
- Retinitis: 0.61%

Disease Descriptions:

- Arteriosclerotic Retinopathy:

Changes in the retinal arteries due to arteriosclerosis.

- Diabetic Retinopathy:

A complication of diabetes that damages the retina's blood vessels.

- Retinitis:

Inflammation of the retina, possibly from infection or autoimmune causes.

Disease Descriptions:

- Diabetic Retinopathy:

A complication of diabetes that damages the retina's blood vessels.

- Normal:

No detectable abnormalities in the retinal image.

- Media Haze:

Clouding or opacity in the eye's media, often affecting image clarity.

- Optic Disc Cupping:

Enlargement of the optic disc cup, often associated with glaucoma.

- Tessellation:

Fundus Analysis Report

A retinal appearance with prominent choroidal vessels, often linked to myopia.

- Age-Related Macular Degeneration:

Degeneration of the macula causing vision loss in older adults.

- Myopia:

Nearsightedness; distant objects appear blurry.

- Branch Retinal Vein Occlusion:

Blockage of a small vein in the retina, causing vision issues.

- Optic Disc Pallor:

Pale appearance of the optic disc, indicating optic nerve damage.

- Central Retinal Vein Occlusion:

Blockage of the main retinal vein, leading to vision loss.

- Choroidal Neovascularization:

Growth of abnormal blood vessels under the retina, causing leakage and vision loss.

- Retinitis:

Inflammation of the retina, possibly from infection or autoimmune causes.

- Optic Disc Edema:

Swelling of the optic disc due to increased intracranial pressure or inflammation.

- Laser Scars:

Scarring from previous laser treatments in the retina.

- Central Serous Retinopathy:

Fluid buildup under the retina that distorts vision.

- Hypertensive Retinopathy:

Retinal damage caused by high blood pressure.

Fundus Analysis Report

- Arteriosclerotic Retinopathy:

Changes in the retinal arteries due to arteriosclerosis.

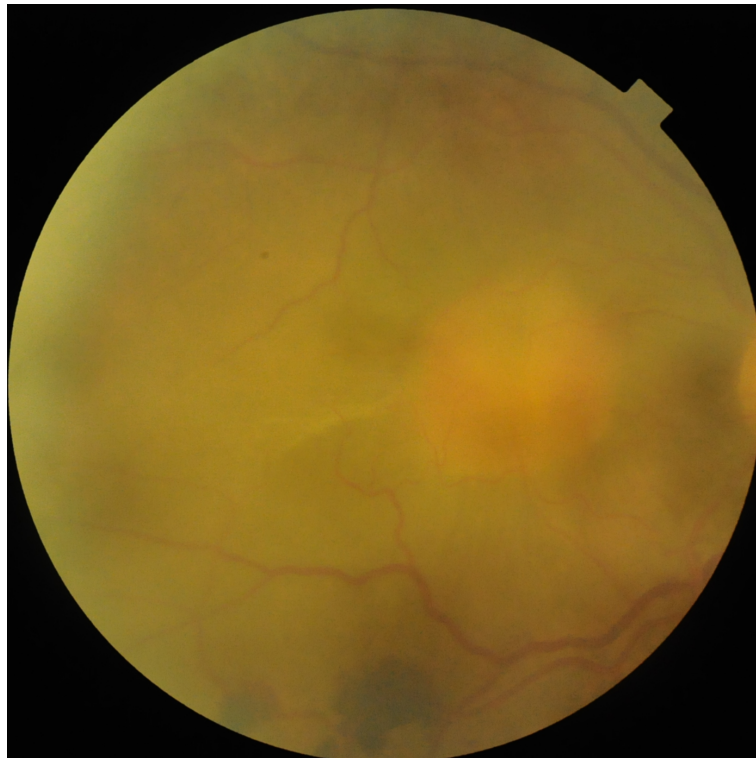

- Chorioretinitis:

Inflammation of both the choroid and retina, often due to infection.

- Others:

Other retinal or ocular abnormalities not classified above.
